FCSIT handed over 12 units of used computers as a donation to Sarakup Indu Dayak Sarawak (SIDS). These past few years, the computers were used in the faculty to nurture young minds, train professionals and create memorable experiences. They were taken care of by a group of dedicated technicians, always being checked by the good "doctors" in the house. Now, these computers found a new home. A new entrepreneur incubator will be established by SIDS with the hope to kick start programs that will bring new hope and greater opportunities to the Dayak women. The university, especially FCSIT, is honoured to be part of this initiative and hopes that the program achieve its objectives.

"From what we get, we can make a living; what we give, however, makes a life."

~ Winston Churchill
