

CSR Pulau Salak & SK Salak

A half day CyberSafe program was conducted at Kg Pulau Salak on 20th April 2019 involving 15 adults and 35 school children from Sk Salak. The objective of the program is to provide awareness and knowledge to the community on the threats and danger that comes from the usage of the Internet. The community was provided free wifi service as of 2018 from Sacofa Sdn. Bhd. And this program is to ensure that the access to the Internet comes with the knowledge on the threats and danger that comes with it, and ways to avoid them.

The training is part of the Service Learning program under FCSIT/UNIMAS led by En Abdul Rahman Mat in collaboration with the FCSIT Community Service Team led by Dr Sze San Nah, while the programs was delivered by the students under the SL group.
