

NASA International SpaceApps Challenge

All FCSIT students are invited to participate in NASA International SpaceApps Challenge. The NASA International Space Apps Challenge (or Space Apps) is an international hackathon (coding competition) that will take place over a 48-hour period virtually for cities around the globe between October 2nd and 3rd, 2021. The event embraces collaborative problem solving with a goal of producing open-source solutions to challenges we currently face on Earth and in space.

Criteria:

Participants will organise into project teams focused on solving one of the specific challenges issued by NASA. Each team will go through zone judging, followed by state level judging and lastly eligible team will also be selected for global judging by NASA subject matter experts.

A briefing is scheduled on 27-Aug for students and university to find out more information.

Register for the briefing through www.spaceappssarawak.com/briefing
