

JAVASCRIPT WORKSHOP

JAVASCRIPT WORKSHOP

LEARN.APPLY.SHOWCASE

All Sarawak university/college students are invited. Priority will be given to FYP students

On the most recent StackOverflow developer survey in 2021, JavaScript (followed by HTML/CSS) ranked as the most popular programming languages. 4 of the top 5 web frameworks (either server-side or front-end) are written in JavaScript. Given its versatility across multiple diverse domains and its dominance in the developer community, basic knowledge of JavaScript is almost a necessary prerequisite for anyone aspiring to a long-term career in software development.

DATE: 19,23,26 March 2022

TIME: 8:00PM - 10.30PM

WHAT YOU WILL LEARN

- Fundamentals of JavaScript that are necessary for front end web development
- Using JavaScript to work with the browser DOM
- Adding simple interactivity to a static web page via a JavaScript program

Note : Participants who complete this workshop will be invited for React Native training.

ORGANIZED BY

**dream
CATCHER**

Javascript Workshop **FREE** for FCSIT students

As we all know, JavaScript is a lightweight, interpreted programming language that is primarily used in providing dynamic interactivity to web pages created in HTML and styled with CSS. All modern web browsers provide extensive support for executing and debugging JavaScript programs. JavaScript is absolutely essential for modern frontend web application development, and all the popular frontend development frameworks such as Angular, React and Vue are based on JavaScript. This 3-day workshop is **free**, organised by DreamCatcher Asia and supported by Sarawak Digital Economy Corporation (SDEC). Do not miss the opportunity to brush up your skills. Priority given to FYP students, however students in any year are also encouraged to join.
