Limited to 65 participants.

FCSIT UNIMAS | www.fcsit.unimas.my

Meet Mr Reuben Wee in FCSIT's upcoming Tech Industry Talk on Wednesday 13 April 2022, 12-2pm at the faculty's Theatre MultiMedia lecture hall. Targeted to all undergraduate students including those in matriculation. Limited to 65 students.

Mr Reuben Wee is the faculty's longtime Industry collaborator who has passion in sharing his enormous experience in the tech industry. We are glad to know that he is willing to speak to students and share his knowledge in this talk.

He has over twenty years of oilfield experience at the Independent Data Services Pty. Ltd company; where he was part of the company start-up as the Key Technical Developer, Chief Technology Officer and Director. His experience in digitizing the oilfield industry; mainly in data management, reporting solutions, process monitoring and automation to upstream oil and gas globally, enable him to share his vast expertise with the clients, providing first-hand information. Beyond the oilfield, he has extensive experience in working with industries from F&B logistics and operations telecommunication, cloud computing infrastructure companies and higher education institutions.
